Market Research

Why VeriFresh has a strong fit with budget-focused, time-strapped home cooks

23.5M

tons of surplus food were generated in U.S. homes in 2024.

\$760+

average annual spend on food that goes uneaten per American.

35%

say saving money is the main reason they cook at home.

VeriFresh

Target segment

Primary audience: ages 18–30—college students, grad students, and young professionals with busy schedules, smaller kitchens, and tighter grocery budgets.

Why demand exists

Food waste is expensive, grocery prices are still elevated, and younger adults say time is their biggest barrier to cooking. A product that turns freshness into simple alerts reduces guesswork and helps users waste less.

Competitive landscape

App-based trackers like NoWaste and Fridgely help log expiration dates, while containers like Rubbermaid FreshWorks and OXO GreenSaver help preserve produce. VeriFresh can stand out by combining storage, freshness timing, and notifications in one

Opportunity: position VeriFresh as a simple, low-effort way for students and young professionals to save money, avoid spoilage, and feel confident about food safety.

SWOT Analysis

Strengths

Internal

- Innovative sensors that track food freshness
- Unique technology that connects to users smartphone and sends notification updates.
- Strong product design

Weaknesses

Internal

- High production costs due to advanced technology
- Ongoing technology maintenance and product testing
- Limited brand recognition

Opportunities

External

- Growing focus on sustainability
- Expansion into smart home integration
- Rising food costs
- Potential partnerships with grocery stores, food services and restaurants

Threats

External

- Rapid technology advancement leading to faster product obsolescence
- Economic downturns
- Consumers unwilling to pay for the product
- Strong competition from existing solutions

Segmentation by demographics

18-30

- College Students
- Young professionals

30-55

- Working adults
- Families

55+

- Older working adults
- Retired individuals

Behavior/ psychographic Groups - all ages

Budget conscious consumers

- Value saving money
- Our product: Reduces waste, saves Money spent on groceries

Health Concious consumers

- Value meal prepping and food freshness which our product can help individuals with

Positioning Statement

VeriFresh makes food storage easier by tracking food freshness, sending alerts to consumers, reducing waste, saving money, and improving food safety. Unlike traditional food containers, VeriFresh utilizes advanced technology to provide accurate freshness monitoring.

Four P's

Product: Preservation System

- **Hardware:** Stackable glass containers with gas-detecting sensors and color-coded LED lids.
- **Design & Branding:** Sleek "Eco-Tech" aesthetic; modern green/grey palette.
- **Packaging:** 100% recycled materials with QR-code manuals to eliminate paper waste.

Price: Value-Driven

- **Price Point:** \$89 Starter Kit / \$149 Pro Bundle.
- **The Justification:** Positioned as an investment that recoups the average \$1,500 annual household food waste.
- **Revenue Stream:** Optional app subscription for advanced nutrient tracking and auto-replenishment.

Place: Hybrid Distribution

- **Channels:** Direct-to-Consumer (DTC) website and premium retailers like Williams-Sonoma.
- **Fulfillment:** Managed via 3PL (Third-Party Logistics) for rapid shipping.
- **Sustainability:** Specialized "Circular Tech" program for sensor-lid recycling and refurbishment.

Promotion: "Kitchen Confidence"

- **Digital:** Targeted TikTok/Instagram ads focused on "Aesthetic Fridge" and "Zero-Waste" trends.
- **PR & Authority:** Feature reviews in Wired and Good Housekeeping to build tech credibility.
- **Incentives:** 15% "Refer-a-Friend" discounts to drive organic growth in the meal-prep community.

Digital Marketing Strategy

Platforms you can find us on:

- Instagram, YouTube, TikTok, Twitter / X, Facebook

Handles & Hashtags:

- @VeriFresh
- #VeriFresh #ZeroWaste #KitchenConfidence

- Discount offers and promo codes
- Newsletters
- Post-purchase offers to upsell (app, cleaning devices, etc.)
- Re-engagement promotions

Implementation Plan

Timeline, Key Milestones, Responsible Parties

Rough Timeline (6 months)

Month 01+02

Product development finalization and testing

Month 03

Market testing and feedback
collection

Month 04

Marketing campaign launch
(digital + PR)

Month 05

Retail distribution rollout

Month 06+

Optimization + Growth

The Main Responsible Parties

Product team (development)

This team is responsible for finalizing the product design, ensuring sensor accuracy, and delivering a reliable mobile app.

Note: Secondary parties/specifics may involve the following:

- Digital Marketing & Social Media Team
- Sales & Retail Partnership Team
- Customer Experience & Support Team
- Data Analytics Team

Marketing team (campaign execution)

The marketing leadership team is responsible for overall campaign strategy, positioning, and budget allocation.

Supply chain team (distribution and logistics)

This team oversees sourcing, manufacturing, inventory planning, and distribution logistics. They ensure that production aligns with demand forecasts and that products are delivered on time to both warehouses and retail partners.

Cost BREAKDOWN

Budget Breakdown

Market Research = \$20,000

Goal: Understand our target consumer and how our product will perform in the market.

Product Development = \$100,000

Goal: Design and build a market-ready product prototype.

Prototype & Testing = \$40,000

Goal: Create early versions of the product, conduct lab testing and user testing before it reaches the market

Promotion & Marketing = \$70,000

Goal: Reach young consumers through social media ads and partner with influencers.

Distribution & Logistics = \$50,000

Goal: Deliver product to customers, set up website for direct purchases.

Other Costs = \$20,000

Legal & IP: Patents and trademarks, Backup budget for unexpected costs.

Total Cost = \$300,000

Evaluation and metrics

Purpose:

- To measure the effectiveness of the product in reducing food waste, improving food safety, and driving user adoption among the target market (ages 18–30).

Sales & Revenue:

- Track total units sold, revenue per unit, and growth in sales after launch milestones.

User Adoption & Engagement:

- Measure number of active users, frequency of app usage, and interaction with freshness alerts and notifications.

Product Performance:

- Evaluate accuracy of food freshness tracking, reliability of notifications, and overall system functionality.

Evaluation and metrics (continued)

Customer Satisfaction:

- Collect user ratings, feedback, repeat usage rates, and overall trust in the product's recommendations.

Impact on Food Waste & Cost Savings:

- Assess reduction in food waste and estimated money saved by users, aligning with the product's core value proposition.

ROI & Marketing Effectiveness:

- Analyze return on investment from marketing campaigns and identify the most effective channels for the 18–30 demographic.

Thank You
